MIGRATION AND BRAIN DRAIN

PART I (1925-1965) and Part II (1966-1973)

A SELECTED RESEARCH BIBLIOGRAPHY

PREFACE

The present bibliography contains over 100 selected references on migration of human population and brain drain published chiefly during 1925-1965. The references listed in the bibliography are by no means definitive nor are they meant to be, but they represent many of the old and current publications which may be used as guides for further research. The bibliography is divided into two parts: Part One contains the listing of books and monographs and Part Two is a listing of articles appearing in related journals and periodicals. The listings are arranged by the author in alphabetical order when possible.

I would like to thank Mrs. Mary Vance, Editor, Council of Planning Librarians, for her encouragement in the compilation of this bibliography. It is my hope that those engaged in various aspects of migration and brain drain policy research will find this reference material a useful and informative instrument.
